

# e-panel™

## Aluminum Composite Material

### The Ultimate Substrate for Flat Sheet Applications

Alcan Composites USA has recently introduced a new ACM product designed for flat sheet applications. With many of the same great features as Alcan's Dibond® product, the e-panel™ can be saw cut, routed or punched. It is suitable for direct digital or screen print, and is ideal for mounted graphics.

Masked both sides, the e-panel™ has .008" aluminum polyester painted facers with a solid black polyethylene core.

#### Applications:

- Direct Digital Printing
- Mounted Graphics
- Exhibits & Kiosks
- Interior & Exterior Signs
- Framing
- Point-of-Purchase Displays

#### Specifications:

Sheet Size: 4' x 8'

Thickness: 2mm, 3mm, 4mm

.008" aluminum polyester painted facers

White sheet with black polyethylene core

Masked both sides
